

Colorful Rubber Reins

Liangju Rubber is a ISO certified manufacturer of color full rubber reins for bridle. All the Colorful Rubber Reins are made from quality colorful rubber with fabric inside to enhance strength. We provide custom molded rubber reins come in a variety of materials, widths, and thicknesses to suit your preference.

1. Product Introduction of the Rubber Reins

The rubber rein is the perfect rein for wet weather, sweaty horses or just when the rider needs an extra grip. Often used for Eventing and Jumping these English reins get their gripping power from the pebbled rubber section where the rider's hands hold the reins.

Liangju Rubber is a ISO certified manufacturer of color full rubber reins for bridle. All the rubber reins is made from quality colorful rubber with fabric inside to enhance strength. We provide custom molded rubber reins come in a variety of materials, widths, and thicknesses to suit your preference.

Feature of Colorful Rubber Reins:

All rubber reins are using soft rubber with fabric inside to ensure the strength

Customized LOGO on the reins are available

There are small or large pimples on the surface to help the riders to hold the bridle easily

6. FAQ

1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

2. If OEM is acceptable?

Yes, Samples are Free of charge

3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

4. Why is rubber used to produce industrial products?

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

5. Which type of rubber is best for my application?

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
